

Extreme Gator

Our modified John Deere Pro Gator is capable of carrying any crane up to 30' and as well the new Scorpio 45. It is fully self contained unit including onboard battery power for the cranes, remote head and monitors. The Extreme Gator has multiple storage opportunities so you can go off the beaten path with everything you need to shoot. When the going gets rough, using the optional counterweight carriers lowers the center of gravity to make the most severe terrain manageable. In addition, the Extreme Gator has a hydraulic levelling post and support screw jacks. Optional Mattracks and chains for extreme terrain.

Specifications

John Deere 2030A Jacobsen Truckster XD Diesel ProGator Utility Vehicle
